

# Saalio®

Modern Iontophoresis Device for Treating Excessive Perspiration

- Direct und Pulsed Current in one Device
- Graphite Electrodes in Place of Metall Electrodes
- Intuitive Operation

# Saalio®

The Saalio® device is a modern therapy unit for tap water iontophoresis dedicated for professional use as well as for home therapy. Based on longstanding experience the Saalio® device guarantees maximal safety and comfortable application.

## Safety first - Safe Use of Electricity

- Intelligent control software automatically minimizes potential voltage peaks (electric fence effect)
- Insulated socket and connector systems

## Skin-compatible - no metals or additives

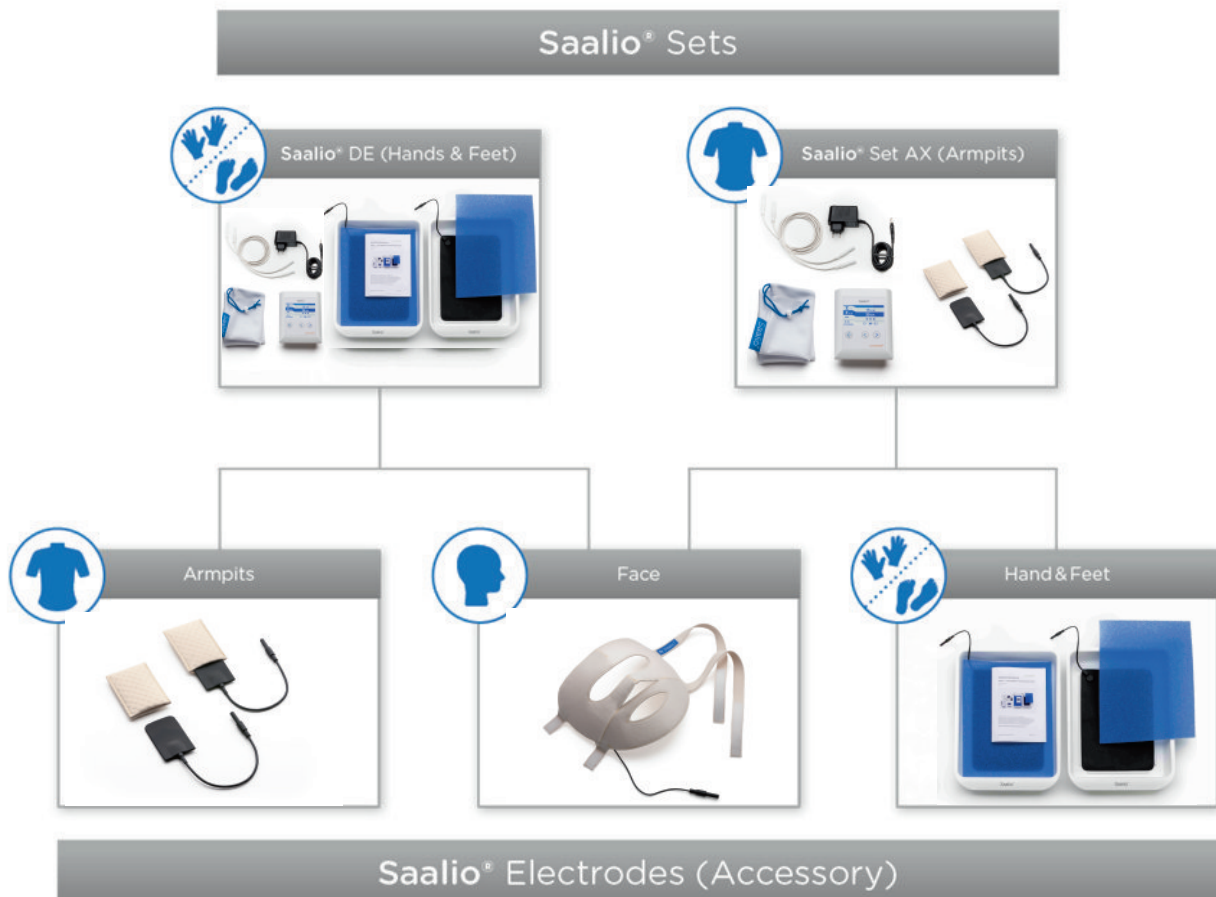

- Large-area and highly conductive graphite electrodes
- Fleece made of natural materials (cotton and cellulose)

## Powerful and versatile

- Direct current and pulse current in one device
- Max. 30 mA at 2kOhm body resistance
- Can be combined with various electrodes

## Ergonomic and modern

- Large display with simple menu structure
- Pause- and memory functions
- Special comfort basin with armrests
